B0 block output: real channel learning images

first residual + MLP branch → complete Block 0 output · same frozen input and gray reference

Input

	Channel 0	Channel 255	Channel 511	Channel 767
Learning image input coordinates				
Token response internal indices				

Top: positive response contributions · 224 × 224 Bottom: signed output values · 14 × 14

Each target sums one fixed channel over 196 patch tokens · per-panel display scales
