B0 MLP branch: real channel learning images

LN2 → fc1 → GELU → fc2 → layer scale/drop path · same frozen input and gray reference

Input

	Channel 0	Channel 255	Channel 511	Channel 767
Learning image input coordinates				
Token response internal indices				

Top: positive response contributions · 224 × 224 Bottom: signed output values · 14 × 14

Each target sums one fixed channel over 196 patch tokens · per-panel display scales
