Classifier outputs: correct, competitor, margin, and low-score target

One frozen image · full 12-block path · one shared signed-log scale across all four maps

Input
GT: German shepherd

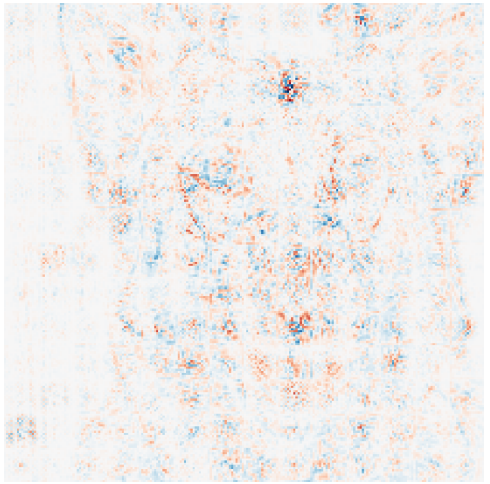

Correct · class 235
German shepherd

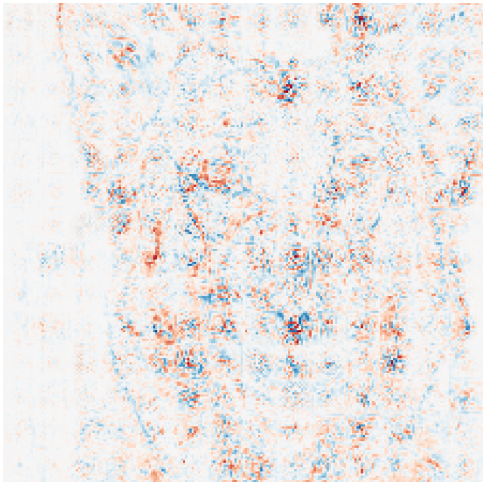

clean 8.0826 | Δ 8.4666
ΣL = 8.4715

Runner-up · class 174
Norwegian elkhound

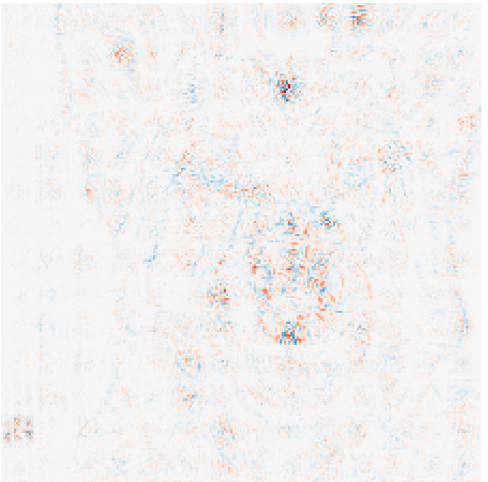

clean 7.6327 | Δ 8.2468
ΣL = 8.2483

Decision margin
logit[235] − logit[174]

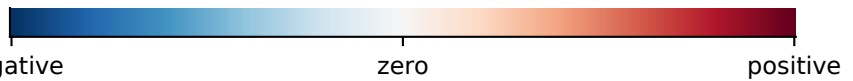

clean 0.4499 | Δ 0.2199
ΣL = 0.2232

Lowest score · class 171
Italian greyhound

clean -2.9210 | Δ -2.4898
ΣL = -2.4896

Margin is computed pixelwise as L235 − L174 · lowest-score class is global argmin before viewing maps
