# 01 From NNS propagation to an Endpoint learning image

One observed image · one registered scalar · the current input Jacobian

Input → frozen ViT → class logit

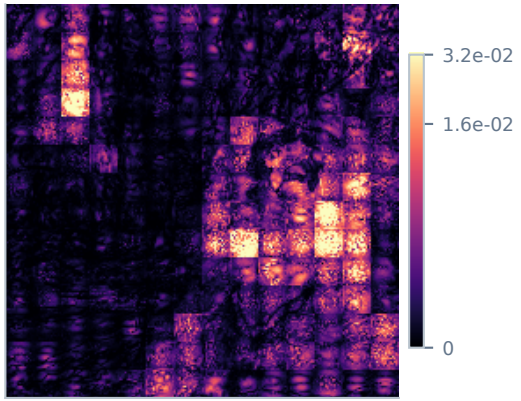

Signed learning image

L1 148 L2 1.11
Signed sum 0.565

Absolute input dependence

L1 148 L2 1.11
Signed sum 0.565

$$\mathcal{L}(x;x) = \mathrm{diag}(x) \quad \longrightarrow \quad E_s(x) = \mathrm{diag}(x)\nabla_x s(x)$$

DeiT-S/16 · ImageNet class 297 (sloth bear) · signed RGB projection and RGB absolute mass
