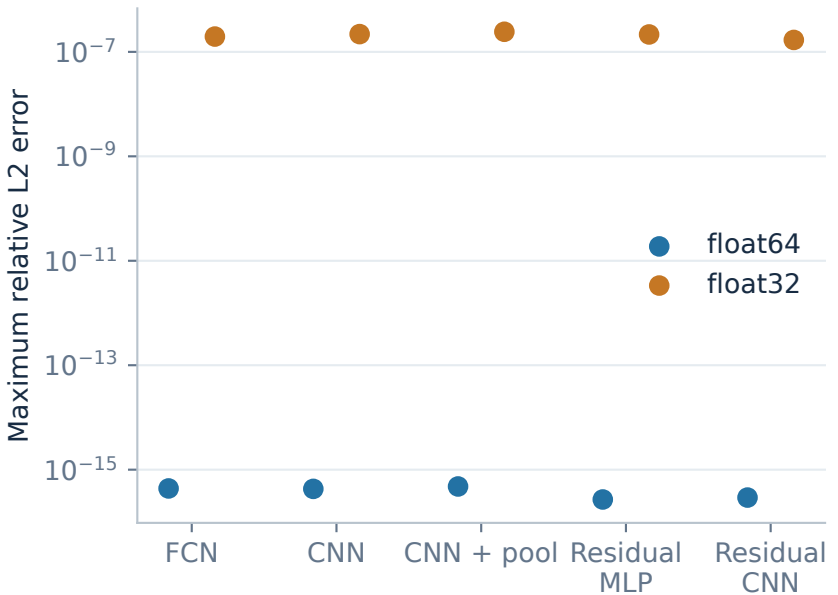
03 Numerical fidelity and implementation correctness

Independent identities are checked before interpreting finite interventions



5,000 / 5,000

NNS–Endpoint comparisons pass

76,800 / 76,800

Positive structural closures pass

28,800 / 28,800

Omission / duplication controls rejected

6,144 / 6,144

Condition-scaled analytic JVP checks pass

88 / 88

Operator-direction checks pass
