10 Spatial intervention: effect scale and estimator boundary

Registered block-5 task · 0–25% area · isolated head replacement · 400 images per family

Identity

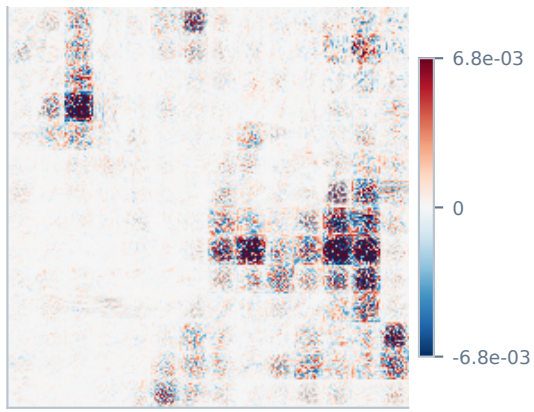

NNS = local Jacobian seed

Correctness

Closed cuts; direction checks

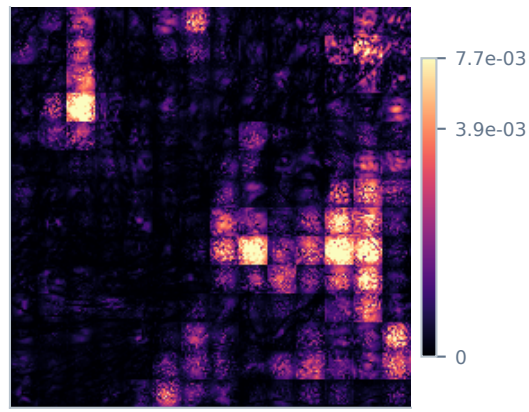

Utility: measured separately

Head 0 · signed Endpoint

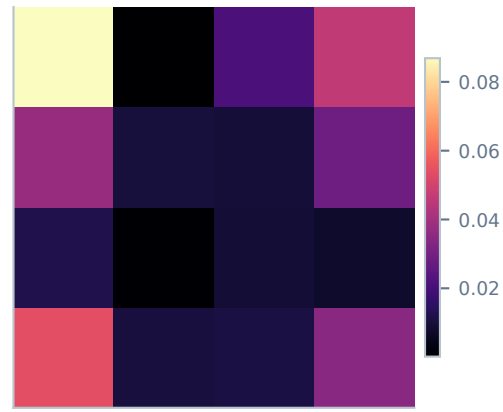

L1 29.8 L2 0.296
Signed sum 0.108

Head 0 · absolute Endpoint

L1 29.8 L2 0.296
Signed sum 0.108

Regional Taylor magnitude
16 candidate regions

Same sloth-bear image, DeiT-S/16, GT logit, normalized-zero reference. Taylor colors encode region scores, not pixel Endpoint.
