# What does a patch-level explanation leave inside a patch?

## 01 Image

224 × 224 image

14 × 14 patch tokens

## 02 Internal pathway

**ViT-B/16**

12 blocks

Select a fixed block / head

## 03 Spatial readout

**NNS**

Within-patch detail

**Patch baseline**

Uniform allocation

Same target and intervention budget

## 04 Intervention

Restore / remove ranked regions

**Paired image-level fidelity**

$\Delta FID = F(NNS) - F(patch)$

Scale · heads · depth · branches
