From spatial ranking to a paired image-level effect

a Choose the intervention unit

14 × 14 native grid

196 patches

One 16 × 16 patch

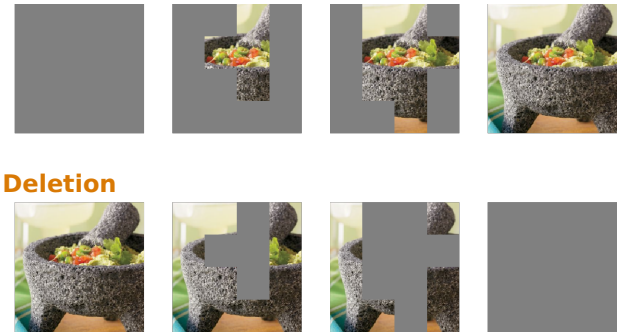

16 cells of 4 × 4 pixels

Fine: 3,136 cells · Native: 196 patches

b Restore and remove in rank order

Insertion

Deletion

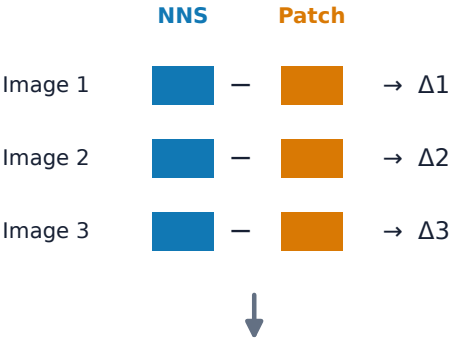

0 ¼ ½ 1

21 fractions · 5 paired tie repeats

Gray reference: normalized zero / RGB 0.5

c Aggregate by image

Median across images

Paired image bootstrap → 95% CI

$$F = \tfrac{1}{2}(\text{AUC insertion} - \text{AUC deletion}) \qquad \Delta\text{FID}_i = F_i(\text{NNS}) - F_i(\text{patch})$$
